Basic information

Payment module for cashless transactions in PrestaShop 1.7.

System requirements

- PrestaShop version 1.7
- PHP version compliant with the requirements for the given store version.

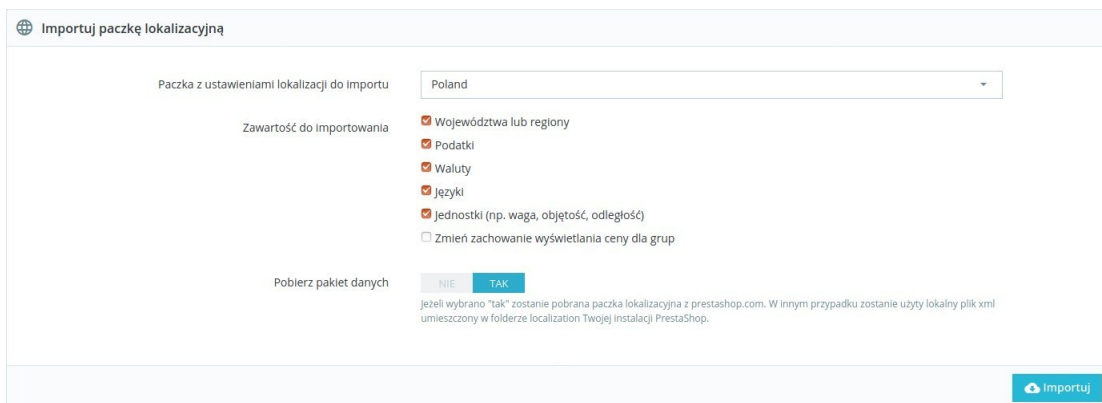

Description of changes

Version 1.0.0

- Initial document release

Localization pack installation

1. Go to *Upgrades* → *International* → *Localization*
2. In the field "*Pack with import location settings*" select the country „*Poland*"
3. Click the "*Import*" button

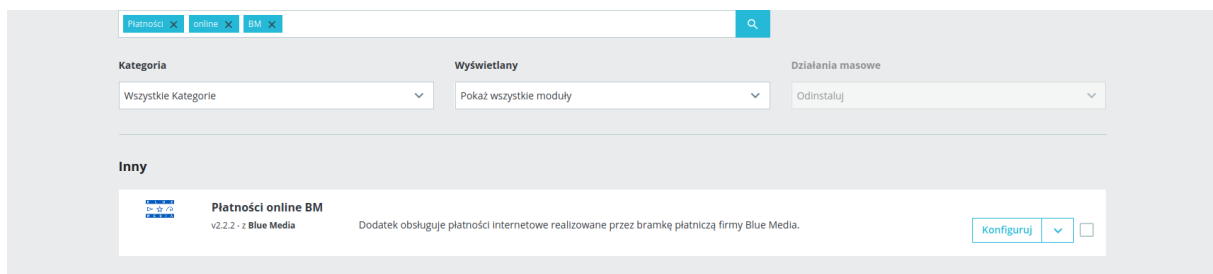

Localization packs importer

Module installation

1. Go to *Upgrades* → *Directory*
2. Search for the "*BM online payment*" module
3. Click on the "*Install*" button
4. After installation, use the "*Configure*" button - you will be redirected to the module's admin panel

Module configuration

If you were not redirected to the module's admin panel during installation, go to Upgrades → Modules → Module Manager and search for the "BM Online Payments" plugin.

Click the *"Configure"* button to go to the module's admin panel.

Sample module configuration

1. Configuration of *"Settings"* section

- "Use test environment."

Choosing "Yes" causes all payments to be redirected to a test payment gateway, which is located at <https://pay-accept.bm.pl/>. Otherwise a production payment gateway will be set - all payments will be redirected to <https://pay.bm.pl/>

- "Show payment channels in the store"

Choosing "Yes" displays additional payment methods, i.e. Blik, Google Pay, Alior Raty, credit card. Otherwise, only the possibility of payment using the BlueMedia gateway will be displayed.

- "Show payment channels logo."

Choosing "Yes" displays the logo next to the payment methods when choosing the option of payment via the BlueMedia gateway. Otherwise, only the name of the bank without its logo will be displayed.

- "Show banner with payment methods".

Choosing "Yes" displays all payment methods. Otherwise, the banner is not displayed.

Sample banner with payment list

- "Pending payment status"

Status in the admin panel when payment is in waiting mode

- "Valid payment status"

Status in the admin panel when the payment was successfully completed

- "Invalid payment status"

Status in the admin panel when the payment was unsuccessful.

Sample table with orders

- "Payment method name"

The field allows you to enter additional text, which will be displayed next to the BlueMedia logo in the last step of the order, i.e. *"Payment"*.

- "Additional description next to payment method name"

The field allows you to enter additional text, which will be displayed above the banner with currently supported banks.

2. Configuration of "Module settings for given currencies" section

- "Partner's website ID"

A numerical value. Contains a unique store ID.

- "Shared key"

Unique key assigned to a particular store.

The values of both fields are provided by BlueMedia.

Number of sections that contain the fields "Partner's website ID" and "Shared key" depends on the currency settings, which are available in the *Upgrades → International → Localization → Currencies* section.

Configuration of payments

1. Go to *Upgrades → Payment → Preferences*
2. In the "Country restrictions" section, select the countries where the payment gateway is to be available - to select all countries click on the column header, i.e. *"BM online payments"*

Ograniczenia kraju				
Proszę zaznaczyć kraj lub kraje dla których dany moduł płatności będzie aktywny.				
Ograniczenia kraju	Czek	PrestaShop Checkout	Płatności elektroniczne	Płatności online BM
Afghanistan	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Aland Islands	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Albania	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

				Zapisz

Configuration of user-friendly URLs

1. Go to *Configure → Preferences → Traffic*

2. In the "Set URLs" section for the "User-friendly URL" field, select "YES"

Ustaw URL-e

Aby można było korzystać z tego narzędzia, musisz:

- 1) Utwórz pusty plik `.htaccess` file w Twoim katalogu głównym.
- 2) Nadaj mu uprawnienia do zapisu (CHMOD 666 w systemach Unix).

Przyjazny adres URL ☐ NIE ☒ TAK

Wyróżniony URL ☐ NIE ☒ TAK

Przekieruj do kanonicznego URL

Zapisz

According to PrestaShop 1.7, to use this tool, you must:

- Create an empty `.htaccess` file in your root directory.
- Give it write permissions (CHMOD 666 on Unix systems).

Configuration of payment channel management

1. Go to *More* → *Blue Media Payment channels management*

Synchronization

1. Click on the *"Synchronization"* button - it is in the upper right corner
2. A list with the available payment channels will be displayed

Blue Media Zarządzenie kanałami płatności

 
 Synchronizacja Pomoc

1500	Karty	PBC płatność testowa		EUR	+ 1	✓	 Edytuj
509	BLIK	BLIK		EUR	+ 2	✗	 Edytuj
1512	Karty	Google Pay tr		EUR	+ 7	✓	 Edytuj
1506	ALIOR	Alior Raty t		EUR	+ 8	✓	 Edytuj
21	VWB	Przelew Volkswagen Bank		USD	+ 20	✓	 Edytuj

Payment channel editing

1. Click the *"Edit"* button - you will be taken to a separate page
2. Change the value of the *"Payment channel name"* field and then use the *"Save"* button - this will change the name of the payment channel in the last step of the order

Nazwa kanału płatności: BLIK

Anuluj Zapisz

Cha

Changing the "Displayed" value

1. The channel visibility is changed from the list of all payment channels
2. Change the visibility using the icons in the "Displayed" column.

Statuses:

- Channel published 
- Channel hidden 

Numer kanału płatności	Nazwa banku	Nazwa	Logo	Waluta	Pozycja	Wyświetlany	
509	BLIK	BLIK		EUR	+	2	

URL addresses configuration

In BlueMedia administrative panels <https://oplacacie.bm.pl> and <https://oplacacie-accept.bm.pl> make sure, that following fields contain the correct store addresses

- Return payment address configuration
<https://domena-sklepu.pl/module/bluepayment/back>
- Configuration of the URL address to which ITN is sent
<https://domena-sklepu.pl/module/bluepayment/status>
